Field Properties	
PROPERTY	USE
Field Size	The maximum size of your field's data. For example, Text fields can range from 1 to 255 characters. For best performance, always specify the smallest sufficient size. Some data types have a fixed field size, eg. date/time or currency.
Input Mask	It displays editing characters to guide data entry. For example, an input mask for a field with an amount of money might display a dollar sign ($) at the beginning of the field and allow only numbers to be typed.
Caption	This is the label text that is displayed by default for this field in forms, reports, and queries. If this property is empty, the name of the field is used. An effective caption is usually brief.
Default Value	It automatically assigns the specified value to this field when a new record is added.
Validation Rule	An expression that must be true whenever you add or change the value in this field.
Validation Text	A message that is displayed when a value that is entered violates the validation rule above.
Required	This property requires that data must be entered in the field. Use this important fields like names.

Allow Zero Length	It allows entry (by setting to Yes) of a zero-length string ("") a or Memo field.
Indexed	Use indexes on faster frequently used to make the operations involving that field specifies whether the field has an index. .
